

SOC 4650/5650: Week 02 Stata Quick Reference

Christopher Prener, Ph.D.

January 24th, 2017

Import .csv Data

```
import delimited data.csv, varnames(1)
```

List Variable Details

```
describe [varlist]
```

Without the optional *varlist*, all variables in the dataset will be listed.

Frequency Table

```
tabulate varname
```

Listing Observations

```
list varlist in lowVal/highVal
```

For example, `list var in 1/10` would list the first ten instances of the variable `var`.

List Variable Descriptive Statistics

```
summarize [varname]
```

Without the optional *varname*, all variables in the dataset will be listed.

Clearing Stata's Memory

```
clear
```

Getting Help

```
help commandname
```

```
search topic
```

See the **User's Guide** for additional resources for getting help.
